Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 03 September 2003.
- 2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

Newly submitted claim 3 is directed to an invention that is independent or distinct from the invention originally claimed for the following reasons: the newly submitted claim 3 is directed to a kit which was not originally presented for examination.

Since applicant has received an action on the merits for the originally presented invention, this invention has been constructively elected by original presentation for prosecution on the merits. Accordingly, claim 3 has been withdrawn from consideration as being directed to a non-elected invention. See 37 CFR 1.142(b) and MPEP § 821.03.

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claim 1 is rejected under 35 U.S.C. 112, first paragraph, as containing subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. The specification as originally filed does not provide support for a positioning unit to be reversibly attached to a face of the shield, and no description of same is

provided to enable a clear understanding of what is specifically meant by reversibly attached.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 1, as understood, is rejected under 35 U.S.C. 103(a) as being unpatentable over Gould in view of Miller. Gould shows the claimed system with the exception of the plurality of units which is reversibly attached to a face of the shield. Miller shows a plurality of adjustable foot members 40,45, each respectively threadingly engaging a respective depending bracket. It would have been obvious to one of ordinary skill in the art at the time the invention was made to modify Gould for each of his depending bracket 5 to comprise a respective threadingly engaged adjustable foot member, in lieu of the unitary adjustably foot members unit 6,7,6, to enable a plurality of units which may be reversibly attached to either of the elements 4 by means 8.

Claim 1, as understood, is rejected under 35 U.S.C. 103(a) as being unpatentable over Mayer in view of Miller. Mayer shows the claimed system with the exception of the attached brackets with the threadingly engaged rod. Miller

shows a adjustable foot rod 40 threadingly engaging a depending bracket. It would have been obvious to one of ordinary skill in the art at the time the invention was made to modify Miller for each of his depending bracket 13 to comprise a threadingly engaged adjustable foot member to enable positive clamping. Furthermore, to attach the brackets 13 by any conventional removable fasteners, e.g. bolts, screws for their known purpose to enable removable attachment, and to thereby reversible attach brackets as desired, would have been an obvious engineering expedient.

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however,

will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
